WORK EXPERIENCE

Web Developer
AUGUST 2023 to MARCH 2023 (8 months)

As an enthusiastic developer, I've spearheaded a variety of innovative projects in the past five months, showcasing my proficiency in web development. Notably, I engineered a WhatsApp automation system using Selenium Python code, streamlining communication processes efficiently. Additionally, I contributed to the creation and enhancement of several school websites, utilizing Svelte code to ensure seamless user experiences.

One of my significant contributions involved developing an automated receipt system, enhancing customer experience post-registration. Furthermore, I crafted diverse dummy websites, including calculators, portfolios, and an Instagram page, demonstrating versatility and creativity in web design. Moreover, I collaborated on a pizza purchasing website, leveraging my skills to enhance its functionality and user interface.

My diverse portfolio reflects my commitment to excellence and my ability to tackle various challenges in the realm of web development. I am eager to continue contributing to impactful projects and furthering my expertise in this dynamic field.
